

# Our Fifth generation Mobile Software: on-line order entry & cylinder/lot number tracking

- Rugged mobile computer with integrated Bar Code or RFID Reader that is in constant communication with your office server
- Browser based software means programs and data are stored on your main server
- Track cylinders by serial number and lot number using Bar Codes
- Delivery Notes can be printed on a wireless printer in the truck with Gases, Hardgoods, Prices, Serial Number, Lot Number & Signature
- Graphical easy to use touch screens for the truck driver
- Capture signatures on the Tablet PC
- Delivery Notes are priced and all charges (i.e.: Hazardous Material, Fuel Surcharge) are added automatically at the time of entry on the mobile computer
- All transactions are updated on line on your main server
- Delivery Notes can be entered by the driver in the truck and recorded on the office server
- Delivery Notes can be entered at the office and called up on the mobile computer by the driver and delivered

- No more transferring files between your server and the mobile computer
- The option to transfer files to the server is also available, if required.
